

The image shows a 9x9 grid visualization. A legend at the bottom explains the color coding: dark gray for the minimum value (0.00) and light gray for the maximum value (1.00). The grid itself is partially visible, showing a pattern of these two shades. A small inset in the top right corner highlights a 3x3 sub-region of the grid.

9 x 9

 Min value = 0.00

 Max value = 1.00
