

The image shows a 13x13 grid visualization. A legend at the bottom explains the color mapping: dark gray represents the minimum value (0.00) and light gray represents the maximum value (1.00). The grid itself is mostly light gray, with a few dark gray pixels forming a pattern in the top-left corner.

13 x 13

-  Min value = 0.00
-  Max value = 1.00
